List of usability tasks - Equifood Team A

Project Description

The purpose of Equifood is to aid in reducing food wastage in restaurants. This app presents restaurant owners with the idea of giving away excess food at the end of each day at discounted prices, or for free.

Administrators

N/A for the first round of peer testing.

Restaurant Administrators

N/A for the first round of peer testing.

Individuals

As the individual, the user's purpose on this app will be to browse through restaurants and their available food options to see if there are products they would like to reserve to then go pick up from a restaurant within the allotted time frame.

User Scenario

You are a student living in dorms at UBC Okanagan. Your meal plan has run out so you are looking for cheap options to buy a meal. You decide to use the EquiFood app to get a discounted meal from a local restaurant.

User Feedback:

- Browse through different restaurant choices
    - Navigate to the selected restaurant
    - Can navigate back to browsing the restaurant's page

How do you feel about the block-style scroll display?
What other features would make it easier for you to browse options?

- Browse through different food options at a restaurant
    - Navigate to a selected food item
        - Reserve items in your cart
        - Can navigate back to the food options page
    - Reserve items from the same restaurant in your cart
- Navigate to the Cart tab to view reserved items
    - Cancel a reserved item

Did you find it easy to find and reserve an item?
Was it clear where to go to find your cart?
Did you have any trouble navigating between pages?

- Ability to go back from one screen to the previous
- Browse the Restaurant, Cart and Profile tabs at the bottom of the UI which the user can click to navigate to that tab.
    - Profile page not yet developed for the first round of peer testing.

Overall did you find the navigation of the app intuitive?
How do you feel about the color scheme and design?
What features would you like to see added or removed?
Are there any other suggestions or concerns you have?

Think Aloud:
- Find out which shops are closed during the weekend
- List out the items that are available from Jugo Juice
- Reserve 2 items from 2 different restaurants.
- Find the account name of the logged-in user
- View which items are in the cart
- Remove an item from the cart
